

MUTANT

"The evolution of sound - with a Mutant twist"

*Mutant: A variant from the norm, an individual
Euphony: The quality of being pleasing to the ear*

Mutant Euphony - Component speakers

Get your tunes pumping in style! The stunning new range of Euphony mids from Mutant not only look amazing but are also packed full of headline features to match! Built from the highest quality materials and offering uncompromising performance the choice of 5.25" (50W) or 6.5" (60W) rigid yet lightweight woven glass fibre coned woofers pump out sharp, tight mid bass and each is supported by an alloy bullet phase plug that smoothes out the response of the speakers and reduces phase cancellations that cause loss of bass.

Both sets of speakers are complimented by silk dome, wide axis tweeters and are controlled by a state of the art 12dB/octave crossover with built-in tweeter attenuation.

We know that you expect the best from your system so our high quality tweeters are silk domed - ensuring that Mutant Euphony delivers the high-end frequencies with the crystal clear clarity that you want and deserve.

Everyone's ride is different and you've got your own style so we've made sure that our tweeters are both flush and surface mountable giving you more options when choosing their location. What's more the swivel mount tweeters allow you to adjust the angles and find the best acoustics for your car no matter where you choose to mount them or what tunes you want play.

Euphony speakers are Mutant Audio at its' symphonic best.
