

“MONITOR YOUR SUCCESS”

The new range of dash mountable monitors from VEBA – giving you the flexibility to watch over your most valued commodities – whatever they may be!

AV5824DM & AV7024DM DASH MOUNT MONITORS

Welcome to VEBA's brand new and versatile range of dash mountable monitors. To give you the flexibility to meet all of your monitoring needs, they are supplied with an adjustable dash mount stand and are available in a screen size of either 5.8" or 7.0" – the choice is yours.

Whether installed in a Truck, Bus or agricultural vehicle, two AV inputs make it possible to strategically place cameras as required. Depending on your line of business they are ideal for those tight reversing manoeuvres, dangerous blind spots, grain monitoring or even to keep an eye on your passengers!

You might even want to connect your satellite navigation system to one of the two AV inputs or with the 7.0" version (Pictured) an additional AV jack on its front face gives you the option to hook it up there instead!

Importantly the monitors have a built in power converter and a 12V Camera output so no matter what type of vehicle you are installing them into, no complicated installation process will be necessary.

Each monitor comes with an infra-red remote control and its own built in speaker, while the 7.0" version has the additional benefit of a face mounted earphone jack too. Furthermore, both monitors have been given an anti glare treatment and their sunshade design keeps them viewable whatever the weather and wherever they are mounted.
