

“AHEAD OF THE REST”

Welcome to the future with VEBA's new headrest mountable
widescreen monitor

AV70HR - 7" HEADREST MONITOR

Feel at home on the road with VEBA's brand new 7" Widescreen monitor that comes with a headrest mounting box as well as an adjustable dash mount stand. Combine this with its anti-glare treatment and you will soon see that this unit gives you unparalleled versatility when choosing the mounting point that best suits your needs.

The monitor has a stunning 16:9 ratio widescreen format and can be hooked up to the entertainment system of your choice. An additional face mounted AV input point allows further multimedia connectivity - plug in a games console for instance. This versatile monitor gives your passengers a choice of entertainment options at their fingertips.

The AV70HR has its own built in speaker and also features an infra-red remote control, allowing you to put your passengers in control - even from the back seat.

What's more the 2 channel infra-red headphone transmitters make the monitor compatible with VEBA Dual Channel Headphones, so if you have two monitors in your car your passengers can watch a movie on one screen and play games on the other. The two channel transmitters will allow each passenger to have their own independent audio feed, meaning you can concentrate on the Sat Nav or just enjoy some peace and quiet!
