

# “AMPLIFY YOUR ENJOYMENT”

THE AVVA08 EIGHT CHANNEL VIDEO AMPLIFIER - YET ANOTHER  
INNOVATIVE SOLUTION FROM VEBA.

## AVVA08 - 8 CHANNEL VIDEO AMPLIFIER

Keeping entertained on the move has never been simpler!

Perfect for MPV drivers, Caravan users, Boat owners and I.C.E enthusiasts alike, The video amplifier comes with 8 RCA Video outputs that allow the connection of up to 8 monitors at once. Its single RCA Video input point gives you the ability to hook up your DVD/MP4/VCD player or even stream digital T.V throughout your vehicle, wherever and whenever you need it.

A great solution for MPV's and Minivans, the 8 channel amplifier allows the connection of screens in each row of seats, giving every passenger clear access to a screen without having to crane their neck or squint their eyes to see it!

I.C.E enthusiasts can impress their friends with a jaw dropping monitor display - giving their ride some awesome visuals that will enhance the impact of their sounds and make them the centre of attention wherever they go.

Because monitors could be mounted anywhere the video amplifier has 8 independently adjustable variable level controls -that's one for each RCA output - allowing the user to adjust the level of each individual image signal via easy to use control buttons.

Its easy mounting feature and sensible dimensions mean that it can be placed in a variety of locations and kept discreet yet accessible making it the perfect solution for AV fans across the board.
